

FURTHER SOUTH

PRIVATE WELLNESS & OUTDOOR LIVING

SAUNA / STEAM / COLD PLUNGE / POOLS / STONE

Entirely your own.

FURTHER SOUTH creates luxury outdoor living and private wellness spaces. Beautiful pools, cold plunge, saunas and steam rooms, set within natural stone terraces or bespoke indoor spa areas.

A swim before breakfast. The warmth of a sauna at the end of the day. An evening outside with friends. Places in your home to unwind, recharge and relax, whenever the moment feels right.

We bring the facilities, materials and setting together around the way you want to live. From one carefully chosen feature to a complete private spa, each project begins with your home, your tastes and your time.

The pleasure of a private spa. The freedom of having it at home.

A space that changes your day.

Warmth, water and somewhere to pause. A private wellness space brings these simple pleasures into your daily life, with every part designed to feel at home.

ONE FEATURE OR A COMPLETE SPACE

A sauna beside a shower. A steam room and cold plunge. A pool with places to sit and unwind. We help you choose the combination that feels right for your home.

THE WHOLE EXPERIENCE

Privacy, lighting, comfortable seating and room to move matter as much as the facilities themselves. We consider changing, towels, storage and the connection to the garden with you and your design team.

Make warmth part of your day.

The scent of timber. Soft light across the benches. Time to yourself, or a quiet moment together. A sauna can become one of the most enjoyed rooms in your home.

SCANDINAVIAN DESIGN, YOUR WAY

We supply and install Tylö saunas, helping you choose the room, timber finishes, seating and lighting. From a compact personal sauna to a more generous space for two or more, comfort begins with the layout.

PART OF YOUR HOME

Set your sauna within an indoor wellness suite or a suitable garden building. We plan the heater, controls, ventilation and services around the chosen specification, with a shower and somewhere to rest close by.

Step into stillness.

Gentle warmth, enveloping steam and a room that feels entirely your own. A steam room creates a different kind of retreat: intimate, tactile and quietly inviting.

Choose a calm palette of tile or a more expressive mosaic. Shape the seating around the room, soften the light and connect the finishes with the rest of your spa.

CRAFTED AROUND YOUR SPACE

We build bespoke steam rooms using wedi formers. Behind the finished surfaces, we coordinate the room construction, steam equipment, drainage and ventilation so that the experience and the practical details work together.

A refreshing change of pace.

Cool water. A quiet moment. A space that is yours.

A cold plunge adds another dimension to a private wellness space. Beside a sauna, within an indoor spa or in a sheltered garden setting, it can be a compact feature with a distinct character of its own.

A BATH OR A PLUNGE POOL

We supply and install cold plunge baths and pools. We help you choose the format, location and finish, with the water temperature and equipment specified around the intended use.

THOUGHTFULLY POSITIONED

An easy route to the shower, privacy, comfortable access and a place for towels. Cooling equipment, water treatment, drainage and service access are planned with the wider space.

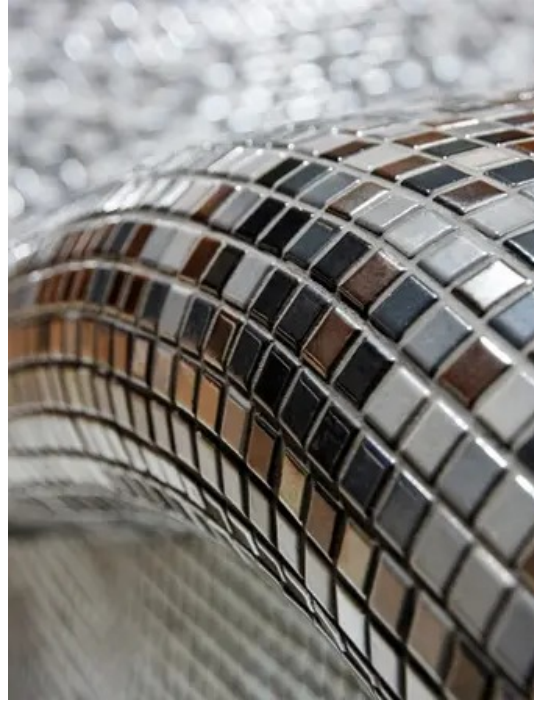

AN INDIVIDUAL ADDITION. PART OF A COMPLETE PRIVATE SPA.

Stay a little longer.

Warm water and unhurried conversation. Somewhere comfortable to sit afterwards. A private spa should make time at home feel generous.

SPAS, INDOORS AND OUT

We supply and install spas as individual features or alongside a pool and wellness suite. Seating, water features, controls and the setting are chosen around how you want to spend your time.

ROOM TO DO NOTHING

A comfortable seat, a sheltered view, soft lighting and a place to set down a drink. We plan these moments with your designer, giving relaxation its own place in the layout.

The space between the facilities is part of the experience.

OUTDOOR LIVING

Long days. Beautiful evenings.

A garden made for the way you live. Early swims, long lunches, family afternoons and evenings that carry on outside. We bring water, stone and places to gather into one setting.

SPACE TO SHARE

Room to dine and entertain, generous terraces and a clear connection to the house. We work with your design team to make the garden inviting and easy to enjoy.

COMFORT THROUGH THE SEASONS

Sun, shade, shelter and privacy shape the layout. Lighting, pool heating and covers help you plan for evening use and the swimming season you have in mind.

Beautiful stone. A setting to live in.

Under bare feet, around the water and beyond the doors of your home. Natural stone brings texture and continuity to terraces, pool surrounds, steps and outdoor rooms.

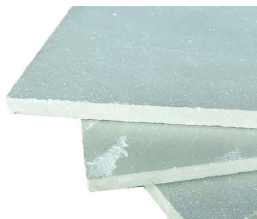

STONE SUPPLY & TERRACE INSTALLATION

Our direct relationship with a specialist stone importer opens up a collection of colours, textures and formats. We supply stone for your appointed installer or undertake the terrace works, as a standalone project or part of a wider scheme.

Your water. Your rhythm.

Swimming for the pleasure of it. A few lengths before the day begins, time with the family or a quiet dip after work. The right pool starts with how you want to use it.

INDOORS

A sheltered place to swim throughout the year, connected to the rest of your spa. Light, acoustics, air quality and humidity control are considered alongside the pool itself.

OUTDOORS

Swimming becomes part of garden life, with room to relax beside the water. Position, privacy, heating, covers and the terrace are planned together around the intended season.

Dimensions, depths, steps and resting places are developed around your household and the character of your home.

A pool with its own character.

The line of the water, the colour beneath it and the way it meets the terrace. We help you choose a premium pool construction approach that serves the design.

NIVEKO POOLS

Individually made pools with a choice of dimensions, colours, steps and waterline details. NIVEKO's High-Tech Polymer construction supports clean, precise finishes, from discreet skimmers to overflow and infinity edges.

REINFORCED CONCRETE

A cast concrete shell offers freedom of form and a wide choice of tile and mosaic finishes. APS constructs shuttered and poured shells in-house, bringing structural detail and finish together from the outset.

We explore the design, setting and programme with you before recommending the specification. Both approaches create distinctive, beautifully finished pools.

Water or terrace. You choose.

A movable floor changes the way the space can be used. Lowered, it creates a pool with an adjustable depth. Fully raised, it becomes usable terrace space, with a tiled finish that can coordinate with the surrounding paving.

MATERIALS, LIGHT & ATMOSPHERE

Luxury in the details.

The grain of timber. A softly lit bench. Stone that carries from the house to the garden. These choices give a wellness space its character and make it feel personal.

A COHERENT PALETTE

We develop the relationship between timber, stone, tile, glass and water with you and your designer. Samples help you judge the colours and textures together, in the light of your own home.

A DIFFERENT FEEL AFTER DARK

Discreet lighting can draw out a surface, soften a room or give the terrace a welcoming evening glow. Controls and lighting scenes are considered as part of the design.

Every part belongs together.

A wellness space should feel like a natural extension of the home. We work with homeowners, architects, interior designers and landscape teams to bring the specialist elements into the wider design.

THE EXPERIENCE YOU SEE

Views, privacy, movement between rooms, comfortable seating and the route to the garden. We explore how you will arrive, change, bathe and relax, so that the layout feels natural.

THE SERVICES BEHIND IT

Structure, power, water, drainage, ventilation and equipment access are coordinated early. We set out the scope and responsibilities clearly with the wider project team.

Beautiful above. Considered below.

The pleasure of a private spa rests on work you may never see: the structure, the water systems, the waterproofing and the connections between them.

Further South brings the residential wellness vision together with APS's pool engineering and construction expertise. Civil engineer Chris Woodridge brings 40 years of engineering experience, including 30 years in swimming pool construction.

That experience informs the details from the outset. Pool shells are planned with their finishes and services, and tested for watertightness before tiling. Practical access is built into the equipment layout for the care that follows.

Confidence in the finished space begins beneath the surface.

Comfort, long after handover.

A beautiful space should be a pleasure to own. Clear controls, sensible equipment choices and dependable care help you spend more time enjoying it.

SIMPLE, INFORMED OWNERSHIP

We explain the controls and routine care at handover. Heating, filtration, water treatment and covers are specified around the facilities you choose and the way you intend to use them.

PLANNED FOR CARE

Equipment needs space to be checked, serviced and eventually replaced. Access, drainage and organised plant areas are considered early, so ongoing care is practical.

ONGOING SUPPORT THROUGH APS

APS provides pool servicing, maintenance and renovation expertise, with ongoing care arrangements discussed as part of your project.

From ideas to everyday enjoyment.

A clear process, with time to make the right choices. We begin with how you want to live and develop the space around it.

O1 Tell us what you have in mind

Your home, your ideas and the way you want to use the space. We discuss the setting, priorities, budget and timing, whether the brief is a single sauna, stone supply or a complete private spa.

O2 Shape the design together

We work through layouts, finishes and equipment with you and your design team. The proposal sets out the scope, specification and responsibilities, with the choices explained clearly.

O3 Bring the space to life

We organise supply and installation within the agreed scope, coordinate with the wider project team and keep you informed as the work progresses.

O4 Make it part of your day

We commission the installed equipment, explain the controls and talk through routine care. You have a clear understanding of how to enjoy the space and arrange ongoing support.
